

# Alfagrease

## RUSTPROOF

### Product Description

ALFAGREASE RUSTPROOF is a mixture of specially selected waxes that provide excellent protection to metallic surfaces in any weather conditions. It contains special additives that offer protection against rust and corrosion both during storage and use of the metallic components. It maintains its elasticity and does not become brittle even in very low temperatures.

### Performance Features

- Long lasting protection from humidity and corrosive environments
- Excellent adhesion to metallic surfaces
- Prolongs operational life of components
- Easy to use

### Application

ALFAGREASE RUSTPROOF is recommended for use in special applications where a product that can offer the upmost protection against humidity, water splash and corrosion.

ALFAGREASE RUSTPROOF is applied as a liquid either by spraying, brushing or dipping the components. Recommended temperature of application is 75°C. It can be removed by using organic solvents or suitable alkaline cleaners.

### Typical Properties:

ALFAGREASE RUSTPROOF		Method
Colour / appearance	Brown	
Structure	Fibrous Paste	
Dropping point °C	64 - 68	ASTM D-2265
Flash Point COC, °C	270	ASTM D-92
Alkalinity	0
